WORK EXPERIENCE

Bain Capabilities Network

Jan 2026 – Jul 2026

Data Analyst Intern

- Developed Snowflake stored procedures for automated data ingestion using SQL, JavaScript, and Python.
- Built and maintained Airflow DAGs to manage and schedule data pipelines from AWS S3.
- Developed React components integrated with OpenAI APIs to generate dynamic SQL queries, execute them, analyze results, and generate user-oriented reports.
- Designed a platform-agnostic pipeline controlled through Airflow and capable of executing workloads across Snowflake and Starburst, helping reduce compute costs.
- Created Iceberg tables to enable unified data access across both Snowflake and Starburst platforms.
- Imported 10+ Snowflake-dependent stored procedures into platform-agnostic Python modules.

EmergX AI

June 2025 – July 2025

Full Stack Intern

- Contributed to the end-to-end development of the company's website.
- Created new pages and implemented dynamic routes in Next.js.
- Enhanced frontend data fetching and API interactions in React to improve functionality and responsiveness.
- Managed the database on MongoDB and improved server-side logic and state management.
- Improved application responsiveness and reduced loading times by 30% by identifying and fixing memory leaks.

PROJECTS

Ultimate Tic-Tac-Toe

- A full-stack web game of Ultimate Tic-Tac-Toe (a board game composed of nine tic-tac-toe boards arranged in a 3×3 grid) supporting local two-player and online multiplayer modes, with shareable room invite links and server-validated moves.
- Built with React, TypeScript, and Vite on the frontend, and Node.js, Express, and Socket.IO on the backend.

Graphical Password

- Generates graphical passwords using user-provided images through image segmentation techniques.
- Built using Python (Tkinter) and SQLite.

Food Scanner

- A mobile application enabling users to scan barcodes of packaged food items and retrieve nutritional values, ingredients, brand information, and more.
- Uses API integration for data fetching and Firebase for user authentication.
- Built with Dart and Flutter, with SQLite for local database storage.

SKILLS

Programming Languages: Python, SQL, MongoDB Query Language (MQL), Golang, Java, HTML, CSS, JavaScript, TypeScript

Frameworks, Tools & Platforms: Next.js, React, Docker, Bash, Git, Android Studio, RESTful APIs, Cursor, Codex, FastAPI, AWS

Concepts: Data Structures and Algorithms, Operating Systems, Object Oriented Programming, Encryption & Decryption, System Design, Agile Methodology, Statistics and Probability, Relational and Non-Relational Databases, Big Data Analysis, Data Preprocessing

Languages: English, Hindi.

EDUCATION

Manipal Institute of Technology, Manipal

2022 – 2026

B.Tech in Computer and Communication Engineering — CGPA: 6.95

- Minor specialization in Full Stack Development and Big Data
